## Comment for planning application WSCC/011/21

Application number Name	JR Sutherland
Address	
Address	FLAT 1, 18A, QUEEN STREET, QUEEN STREET, ARUNDEL, BN18 9JG
Type of Comment	Objection
Comments	I do strongly object to this planned development. From what I can gather this development will involve a substantial increase in HGV traffic on the local roads. Roads that are not capable of taking this sort of traffic. The roads in this area are in poor repair, without exacerbating the problem further. This will no doubt incur an increase in road maintenance effort and costs which will have to be paid for locally. The process of incineration is one of the most inefficient ways of generating electricity, with an severe and adverse impact on climate change. The volume of HGV movements projected will no doubt add to the climate change problems we are facing. The emissions from the incineration, and the heavy increase in HGV movements, will result in poor air quality and will be harmful to the local community. The visual impact of such a development would detract greatly from the beauty of the area and will be an unnecessary and ugly intrusion of industry on the landscape.
