This is not the right location. It will generate increased HGV traffic in the area which will increase harmful emissions in addition to those being emitted by the proposed facility itself. The air quality for existing and new housing under construction will deteriorate. It does not support recycling efforts either locally or regionally and the physical size of such a facility in proximity to the South Downs will impair the visual qualities of the Arun Valley and the shoreline which are a major factor of the leisure and tourism attractions of the area
