	I am writing to object to the proposed incinerator on this application; it will be harmful to wildlife both local and seasonal in the area, it will diminish the beauty of the West Sussex countryside and pollute local areas. There is no reason for the incinerator to be in this place or to be as big. Sussex is a small county and is historic in its nature and with its buildings. People pay council tax to live in such a place, others would love to live in such a county but this would change if the application is granted. Fears of both air and ground pollution cannot be ignored, birds and creatures will be disrupted and habitat destroyed. Please think again.
