## Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Peter Ireland
Address	THE HAMLETS, 19, THE HAMLETS, LITTLEHAMPTON, BN17 5RY
Type of Comment	Objection
Comments	The size of the plant has been very slightly reduced but its the same major issue that burning plastic releases toxins! The impact of gas, smells and other noxious substances is unknown and potentially harmful to our health wellbeing and to our planet. This is not a solution to the objections raised to the previous application, there is no solution as this process to deal with our waste is not the right one. Let us come up with a safe long term solution to our waste, but lets get it right before adding in something like this, that in years to come we know will have caused far more overall damage to our environment and us. The visual impact will be horrendous and we do not want to be known as the county with the incinerator plant to be avoided at all costs! Let us be trail blazers but for the right reasons. The proximity in relation to local residential areas is also of serious significance but these fumes can affect vast areas depending on prevailing winds. There is no scientific data known of the vast implications of toxic fumes and to where they may reach? We have seen how a virus can spread who is to know where these hazardous emissions will go and what affect they will have? Let us look after our planet for us now, for future generations but in a healthy prosperous and clean environment. A definite NO to this!
