Objection

I am greatly concerned at the potential environmental impact of this waste incinerator and also on the potential impact on the health of children and adults living in the surrounding area. My wife and I and our three adult children have all found homes in this area having left the Croydon area four years ago because of the impact on our grandchildren's respiratory health. Both had severe asthma and three other adult members of the family were also diagnosed as asthmatic. One of the main reasons for moving was because our local authority granted permission for a similar incinerator. We moved on the advice of our GP who was herself concerned at the impact of this incinerator in air quality. All the astmatic members of our family have shown considerable improvement since moving here. I note that the assurances given regarding emissions from the proposed incinerator are limited. No similar incinerators have as yet been operating for long enough to know what the longer term consequences on the respiratory health of the local population will be. I also object to the proposed incinerator on the grounds of visual impact of this large industrial building and associated development on this open area, surrounded by farmland and rural landscape. I strongly urge our elected members to think again and deny planning consent to to this blight on our health and environment.
