Comments	This scale of building will be very detrimental to the pleasant views across the Arun and SouthDowns areas of outstanding natural beauty , and not least the stunning views of Arundel which is an important tourist destination. I would strongly urge the council to rethink the strategy behind waste disposal , preferably employing much more technically advanced processing systems that will not pollute the atmosphere . We instead require a concerted effort towards recycling more of our waste rather than burning . There are a number of incinerators in Hampshire, in particular Portsmouth that are underutilised so why do we need one in West Sussex? Who is looking at the bigger picture across several counties?
