Comment for planning application WSCC/011/21	
Application number	WSCC/011/21
Name	Lucy
Address	2 Saxon Way, Yapton, Arundel
Type of Comment	Objection
Comments	This development and construction of the two towers would destroy the picturesque setting to immediate and surrounding environment. Aside from the visual impact, incineration has a huge detrimental effect on the environment and climate change. It is hard to believe that this proposal is even being considered given the concerns over the short and long term effects of outdated means to generate energy. Local traffic will also inevitably increase, already a huge number of HGVs use the single track country roads to access the current site and this will only increase after expansion. The roads are simply not built for this. Secondly many new houses are being built in the area of Yapton and Ford, therefore there will be an increase in children and families using the already narrow pathways and roads to walk along. With an increase in heavy vehicles and machinery along these roads a huge risk is posed to the local people trying to move about their village. This proposal has an overall negative impact on not only the local environment but contradicts the approach that energy and waste disposal companies should be taking at a time where we are all responsible for protecting the environment and undoing the damage of the past.
