Type of Comment	Objection
Comments	1. A new recovery plant should be built by a railway line enabling waste to be delivered by green energy and not create more diesel fumes. 2. The roads cannot support the extra traffic. 3. It is out of keeping with the low lying landscape. 4. The pollution will cause harm. My mother lives near to the one at Newhaven and now suffers from asthma. Something she has never before had. Doctors have told her it's caused by the nearby pollution.
