Comment for planning application WSCC/011/21	
Application number	WSCC/011/21
Name	P.J Cardew
Address	FORD ROAD, 51, FORD ROAD, ARUNDEL, BN18 9EB
Type of Comment	Objection
Comments	I wish to object to the building of this massive industrial plant in the countryside .The visual impact of it is totally out of scale with any other buildings in the area. It goes directly against the Arun District Plan supported by a local referendum . The local roads can not cope with the large HGV trucks needed to service this facility . With the building of the A27 bypass for Arundel now in question this makes were I live on Ford Rd very vunerable to this traffic , I remember the bad old days of the Tarmac Block trucks on Ford Rd with the damage to our houses from vibration and the diesel fumes . With climate change in mind this plant will contribute not diminish to it . The population for miles around will be breathing air with dioxins Nox and ultra fine particulate matter that can be harmful to humans health and the natural invironment. West Sussex already has enough incineration sites this one is driven by financial gain not serving the public , I am amazed that this plan is even being considered and it should be thrown out for good
