

Comment for planning application WSCC/011/21

Application number

WSCC/011/21

Name

Jan Camburn

Address

BAYTREE HOUSE, LYMINSTER ROAD, LYMINSTER ROAD, LITTLEHAMPTON, BN17 7QF

Type of Comment

Objection

Comments

I object to this application on the grounds that it does not sufficient minimise the environmental impact of the incinerator, and vehicle movements. Environmental Impact Although the environmental impact from the incineration process is less that that for landfill the operation of the energy recovery by the incineration of non-recyclable material does not go far enough to reduce the carbon footprint as it does not involve any attempts for the capture of carbon dioxide. Also all vehicles involved in the movement of waste and products fails to reduce the carbon foot print. Such movements should be undertaken by lorries that use either electrical or hydrogen power source. Vehicle Access/Movements Given that the site is operating 24/7 the vehicle access to the site should be also 24/7 to spread the impact of the vehicle movements over 24 hours rather than the 12 hours suggested in the application. To avoid the traffic congestion caused at peak hours, the movement of lorries to /from the site should be banned between the hours of 08:00am and 10:00am and 16:00pm and 19:00pm. Visual Impact To reduce the visual impact of proposed buildings and stack these should be redesigned. The building height should be halved by way of enlarging the building footprint appropriately. The design of the stack(s) should be investigated further to see if shorter fatter stacks would give more stable plume and better distribution of the effluent gasses and micro/nano particles.
