Comment for planning application WSCC/011/21

Application number Name	WSCC/011/21 Elizabeth Lindsell-Lushe

Type of Comment	Objection
	I am concerned that due to the prevailing wind direction dust, odour and fumes from the chimney will direct the majority of air emissions towards Lyminister. Lorry movements taking waste to and from the site also have a detrimental impact with increased traffic generation, noise disturbance and air pollution in the area. As a nurse working and living in the area, the direct consequences of building a structure such as this in an already over populated area will affect the health of the local population leading to increased respiratory/lung problems and a multitude of illness that occur with chronic health issues. This will cause pressure on our already over stretched health services in the area.
