## Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Deborah Froggatt
Address	HONEYWOOD HOUSE, THE STREET, THE STREET, ARUNDEL, BN18 0PY
Type of Comment	Objection
Comments	I strongly object to a harmful industrial incinerator in Ford. The reapplication really has no significant improvements . The development of such a large complex with two 85m high chimneys is totally out of character on a flat rural landscape. The impact on the neighbouring residents will be dreadful, and the planning should be refused on the grounds of the adverse way this would affect the character of the area. There are health issues which do not seem to have been considered enough, Firstly emissions which are above recommended guidelines, and close to schools and nurseries , where children who are most at risk spend a great deal of time. Secondly emissions for the increased volume of traffic, which is running contrary to the governments target. Thirdly noise from all the processes, movement of large machines on site, and constant flow of delivery lorries. Fourthly the dust which will accumulate over the whole area, and settle in lungs causing damage that will be stored for years to come.Fifthly, there will be an increase in the vermin in the area as they will be attracted by the food waste being shifted around on the site.So again the application should be rejected on these grounds. The application has not taken into account the spoiling of the view from the South Downs National Park, and all the elevated countryside above it. Another reason for rejection. The safety of local pedestrians and cyclists has been totally ignored. No provision can be made if lorries are using the small village roads. The increase in lorries will cause the small roads to be broken up and with the proposed A27 route being directed through the area we will be blighted. I believe the planning application is totally abhorant and should be rejected.
