Subject: incinerator
Date: 06 May 2021 10:38:20

I am writing to express objection to the proposed incinerator near Ford Road. The smoke discharged would be harmful to the environment and also to public health with danger to the foetus of pregnant women with the corresponding birth defects and the danger of respiratory disease including cancer. There would be job creation which is always a factor but with this genuinely dangerous project I believe that the health risks outweigh this.
