Subject: ARUN VALLEY RUBBISH INCINERATOR WSCC/011/21
Date: 06 May 2021 11:23:28

Dear Sir,

I am writing to object to the proposed incinerator in the Arun valley.

This application contravenes and goes against the principals of the South Downs national park and sites of specific interest. The visual impact alone would destroy the right people have fought for over many years to protect the ancient sites and the right to well being , especially in the national Park which is protected.

The development will not contribute in any way to green energy and harms the quality of the air with its toxic emmissions. There is not enough monitoring , enforcement or transparancy in the efficient running of such a plant.

The local roads will suffer from the heavy traffic and weight of HGV lorries and cause disturbance in an already overpopulated area. This will make people's lives intolerable.

I strongly object to this proposal.

Yours,

Richard Robbins.
