Subject: Objection to incinerator by Mr and Mrs Gilks
Date: 06 May 2021 16:27:08

70 Ford Road
Arundel
West Sussex
BN18 9EX

6th May 2021

Well, here we go again having to register yet another objection to an ill-conceived plan to build an environmentally harmful incineration site. Dangerous air quality and the visual impact is not wanted here. Why don't you put your energies into opening up your municipal tips and KEEP them open?

Also, why are you treating those of us who live along the Ford Road and surrounding area as third-class citizens with your determination to destroy the remaining and I hasten to add, ever decreasing precious green belt this side of Arundel?

Why would you condemn us all to MORE traffic along a poorly maintained B. Road that is incapable of handling the volume of traffic that uses it now. We already have a planned site for more houses which will only compound the daily problems we currently experience. In 40 years of living in Ford Road you as a council have done absolutely NOTHING to improve the speeding on this dangerous road. You have shown no thought to the local inhabitants by not planning a junction for cars to enter and exit onto the planned new by-pass, so traffic can avoid the bottle neck problems that plague the exit by Californian Terrace onto the Arundel roundabout.

Your unwillingness to address the volume of traffic on this spur road into Arundel speaks volumes that you don't care about your elected duties to serve those of us who are expected to vote for you at local elections. Shame on you all.

As consummate conservatives we have no choice left but to boycott the election today.

It's odd that you haven't taken into consideration the poor prisoners at H M Ford Prison with this proposal, as elected people, you seem to be more concerned with criminals' human rights that you are with your local law-abiding citizens!

Mr and Mrs A J Gilks.
