Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Mrs D Wright
Address	North End Road, Yapton
Type of Comment	Objection
Comments	I am objection to this application on the following grounds: - the building's size and the height of the towers and the visible plume predicted will have an overbearing effect on the area which itself has no buildings of such a height or nature; - It poses a risk of increased traffic at all hours of the day and night wherein the local road network is not placed to support such a use; - Road access is an particularly in light of the current issues getting from the A27 to the area; - There is an existing permission for for a much smaller and more advanced technology gasification plant that would not have the impact that this proposal has on the ecological habitats and local amenities but will create more jobs and benefit the community; - Permission has already been refused for a similar application wherein the changes to the design do not adequately negate the impact of the poor design and appearance.
