Comment for planning application WSCC/011/21

Application M number	VSCC/011/21
Name ra	achel pool
Address N	AVIGATION DRIVE, 74, NAVIGATION DRIVE, ARUNDEL, BN18 0FS
Type of Comment	Objection
sc bu of cc al w m H ric re th th an rc vi ar vi er w w er w	object to this development for the following reasons; Visual impact - being so close to the outhdowns and chichester will affect the character of the area affecting ancient monuments, listed uildings and sites of scientific areas. New houses - there is already a proposed housing development f 1500 new homes plus space for an educational and community centre I cannot see how this is ompatible with the proposal of this development. No need for more incinerators - West Sussex Iready has capacity for incinerations and meets the needs of west sussex. having more incinirators vill reduce the availability to recycle and meet zero emissions set by the government. alteratives waste hanagement are available and should be used to reduce waste via much more greener solutions. Iarming air quality - this type of waste management is one of the worst environmental impacts to get d of our waste, effecting air pollution and vus impacting on the local health and wellbeing of local esidents. and also going against the government policies of reducing harmful emissions, why when here are better ways to get rid of waste. Increased lorries - the local roads are already being damaged nd congested due to all the new houses being built in the area, the road are dangerous as it is. The boads will not be able to cope with the stated and masiviely increased amount of HGVs through the illage. It increases risk of accidents, car and vehicle damage due to poor roads with potholes. there re stretches of roads which is a danger to people in the local area. not only this it will increase the carbon missions because of the amount of additional vehicles through the village. I cannot see how this fits in <i>i</i> th government policy and should really be considered it this is the way forward, it seems like we are aking a backwards step to reducing emissions and environmentally reducing our waste.
