Comments	<input type="text" value="This development will increase traffic along an already over pressured local road system, putting other road users such as cyclists at greater risk. The pollution abd lack of benefits to local villages will be great, not to mention we should be recycling not incineration and the verdict on this industry is still out. The height of the buildings will be a visual eyesore in an otherwise green area with few high rise objects around this will pollute the visual landscape."/>
