Comments	I just wanted to send a comment about the plans you have for Ford Rd. We have more than enough lorries going up and down this road, some going over the level crossing at 5.30 am. We do not need another over 200.000 a year! Which is what you estimate. The talk of putting a bridge over the crossing is not on because that would cut off the entrances to the home for disabilited children and the park homes for retired people. This is a lane NOT a road. There is nowhere to put a cycle path or pavement. The motor bikes that come down here use it as a race track as do some of the cars making as much noise as they can. Please find somewhere else to put this thing, away from population and nature as far as you can. We do not want any more pollution than we already get with the traffic we have. I don't suppose there will be much notice taken of this but some of the recycling men do not care about anyone around them.
