Planning /Comment/WSCC/011/21:

I have lived in the beautiful town of Arundel for over 20yrs, the last eleven of which have been in Tortington Manor, Ford Road. I am appalled at what is being done to this place, an unnecessary bypass, over a thousand new homes and now a monstrosity of an incinerator. All this in an area of outstanding natural beauty. An area which has become seriously congested over the years.

The Ford Road is a nightmare to negotiate with parked cars and the HGV's already allowed access. There have been times when there's been gridlock. This project will generate an enormous increase in lorry traffic going to and from the site which means added congestion and pollution and that is without the pollutants coming from the incinerator. Our already congested roads cannot cope with the size and weight of the HGV's movements being proposed. As Tortington residents our exit onto the Ford Road is hazardous now as the traffic speeds at 60mph.

How can this project be justified when we are all so aware of climate change and as individuals are trying to do 'our bit' to make the world a better place for future generations.

I STRONGLY OBJECT to this planning application for a Rubbish Incinerator on Ford Airfield. An overwhelming number of people oppose this and this should be taken into account. I therefore ask you to REJECT the application and include this submission in your accountability process.
