Collin	ient for planning application wscc/011/21
Application number	WSCC/011/21
Name	Alison Wilkinson
Address	DALLOWAY ROAD, 28, DALLOWAY ROAD, ARUNDEL, BN18 9HW
Type of Comment	Objection
Comments	Whilst we recognise that our population creates waste that needs to be got rid of, this type of super incinerator is not the most environmentally friendly way to do this. The traffic is already intolerable around the Ford area and the increase of lorries bringing the waste to the incinerator will gridlock and pollute this area even more than currently is the case. However, the overriding objection has to be its location so close to the thousand of new and existing houses in this area and what this will, even with modern controls, throw into the atmosphere?
