| Comments | 1. The proposal will necessitate high volumes of heavy lorries on the local roads, already there is a problem with traffic flowing from and to Arundel via ford, there is already high usage of road space due to housing demands 2. The visual impact would be detrimental. owing to the height of the proposals chimneys.3 There would be a detrimental effect on the air quality with more dust Carbon monoxide and Sulphur Dioxide. This proposal is not in the interest of Ford, Arundel, or any of the villages for miles around and we at a loss as to see where the benefits are . |
