Subject: Arun valley incinerator
Date: 10 May 2021 15:18:28

I am writing to register my objections to the proposed rubbish incinerator.

- 1) the effect on the environment and air quality will be harmful to human health.
- 2) it is not in line with reducing harmful greenhouse gasses which is of paramount importance if we are to halt climate change.
- 3) Ford road can't cope with any more traffic especially big lorries. The ones that already use the road frequently cause hold ups as the road is too narrow for large vehicles. This is incompatible with the campaign to make Ford Road safe for cyclists.
- 4) There must be another solution to disposing of rubbish that does not involve burning or sending to poorer countries to dispose of or landfill. One is to do more to recycle, put pressure on large companies to reduce packaging and/ or make it recyclable.

Regards,

Anne ALIDINA
