Comments	We are supposed to be in an area of national beauty - the smoke from this will be seen for miles all along the South Downs . The infrastructure of roads in the area already can't cope let along when the extra traffic comes . Obviously nobody wants this on their doorstep but a more logical place would be on retail warehousing land . This land would be better used for housing if necessary but not an incinerator - it's just the wrong place for it Please reconsider . Many thanks
