---

Dear Sir/Madam,

I am writing this email to the planning department of WSCC as I object to the above planning application to build an incinerator to burn rubbish in the vicinity of the Ford Road. Surely, this method of dealing with refuse is in total opposition to our environmental policy for cleaner air and a reduction of CO2 emissions!

This planning application is truly horrifying. Our beautiful Sussex countryside has already been ruined by the building of houses on our green spaces with no forethought to roads, schools, GP surgeries and all the necessary infrastructure that new housing entails. An incinerator is now the final nail in the coffin.

Yours,  
Diana Stanley  
Arundel
