Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	paul colling
Address	23 Starling Way
Type of Comment	Support
Comments	The Energy from Waste facility will generate 31MW of electricity with around 28MW being sent to the National Grid, which is enough to power 68,000 homes not only that it will create 58 well-paid permanent jobs. This will be on top of supporting off site jobs at Grundon and Viridor head offices. The construction will also create 496 jobs.
