Objection

The proposal for putting a rubbish incinerator in the Ford area is absolutely outrageous. Aside from putting this in close proximity to current housing, there are plans for over 1000 new houses in the general area. Burning rubbish cannot be a healthy option, surely it is better to concentrate on green recycling. If the two chimneys are as high as has been stated it won't just be people living in the near vicinity who would be affected but over a much wider area. If dust from the Sahara can get here on a following wind then how far would all the muck coming from these two chimneys spread. In addition we have all the extra vehicles in and out on roads that cannot currently cope with the present level of traffic, and without all the new homes which are currently under construction. If this is approved by the council, who are after all elected to do their best, not worst, for those who put them there, it will be a total disaster for everyone in this area. One assumes that those empowered with approving this monstrosity will be living where they do not have to view this blot on the landscape, unlike the rest of us!
