Objection

I wish to object to this application for the following reasons:- 1) The incineration process will produce noxious and hazardous emissions and is now considered as one of the worst ways of creating energy and goes completely against the governments criteria of clean renewable energy. 2) The buildings and chimneys are enormous and will be visible for miles and not inkeeping with anything within the local area. 3) The facility will be on top of existing residential property in Ford, Yapton and Clymping, including a proposed very large housing estate which includes plans for a school. 4) The operation will generate 240-400 additional lorry movements per day on top of the already increased lorry movements agreed to other facilities in the area. Many of the lorries will arrive from outside of West Sussex, which will cause considerable traffic increase for all areas around the proposed site. 5) The road access is completely unsuitable and consists of a narrow, single carriageway unclassified road, which is currently deemed as a hazard with the speeding trucks on it. 6) The facility is not required to deal with the waste produced in West Sussex and it is therefore unnecessary, in the wrong place and of no benefit to the local community. 7) Existing industries in the area have operating restrictions on them due to noise, but this facility proposes operating for 24hrs a day, which is going to cause noise problems to everybody in close proximity.
