| Comments                      | I object to this application for several reasons. They are:- The size of the development will have a major visual impact in the area. This will include the large plume of smoke this will produce. The pollution generated will have a detrimental effect on a local and international level. The proposed method of generation of electricity is very ineffcient and costly. The impact on the local development plan, which requires the building of much needed new schools and infrastructure. Increase in road traffic on roads not designed for such large vehciles. |
