Comments	<input type="text" value="We are moving to the area next year and I believe that this is too close to existing and new houses and a school. The pollution levels will rise in such a built up area and can impose various health risks. It will be unsightly and shouldn't be put where people are living. This concerns me as we are moving to the area to raise our newborn and the last thing I want is to move to an area with higher pollution levels causing any risk to my child. Stop the incinerator!!"/>
