Comment for planning application WSCC/011/21	
Application number	WSCC/011/21
Name	Lesley Newman
Address	1 East Bank, North End Road, Yapton, West Sussex
Type of Comment	Objection
Comments	This is not the right area to build such an industrial building. Surely another site away from a residential and rural area can be found. There are numerous housing estates being built in this area so the impact on new and old residents will be huge. I am very very concerned about increased numbers of heavy goods vehicles already using the road I live in, causing congestion and the extra amount of fumes in the atmosphere. Our road is also more congested because of the railway line crossing causing long tailbacks. I have also noticed that some hgvs do not shut off their engines while waiting. If the new recycling centre is built, are the lorries using North End Road to get to the A27? This is not acceptable. The air quality will be seriously compromised. I strongly object to this structure being built, it is not what we want. Build it somewhere else away from people who value the countryside and want to keep it clean and safe to live in. We have endured too much building work in this area, we don't
