Address	JOHNSON WAY, 44, JOHNSON WAY, ARUNDEL, BN18 0TS
Type of Comment	Objection
Comments	Totally inappropriate building for rhe surroundings - we are in an area that relies heavily on seasonal tourism employment. This would have a detrimental effect on the local tourism trade. Worrying implications for the health of the local population regarding pollution and emissions. 30 new jobs generated does not justify the negative impact it will have on so many people for so many reasons. It will not generate wealth in the local area. Totally unsuitable for the poor infrastructure. Design imagery is misleading on planning documentation. This will impact on the local area in only negative ways - huge eyesore, pollution, increased heavy vehicles in an area poorly served by adequate footpaths for locals. I am actually dumbfounded as to why anyone would think this is a good idea in such a landscape where it will be visible from most of the West Sussex viewing points on the southerly ridge of the South Downs National Park.
