Comments	There is not a local need for this proposed facility. The proposed facility will seriously and adversely impact the setting and surrounding area, as a National Park. designated as a National Park. Most importantly, the surrounding infrastructure - especially the road network, is not adequate to deal with the increased traffic and heavy goods vehicles that would result and the pollution caused by the facility - if approved - would adversely impact the air quality and therefore the health of residents and visitors to the area. Please refuse this application.
