## Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	David Lowsley
Address	EAST CLOSE, 8, EAST CLOSE, BOGNOR REGIS, PO22 7RS
Type of Comment	Objection
Comments	I wish to register an objection to this application in the strongest possible terms The siting of an incinerator in this location is plainly wrong in that it will be visually intrusive, over a huge area, it will lead to a decrease in air quality, will damage the South Downs National Park and the increase in road traffic it will undoubtedly cause is unacceptable. The need for this type of facility is not proven and to dress it up as an "energy recovery" system is blatantly untrue as it's primary purpose is as an incinerator to dispose of unwanted material. There are far better ways to manage waste recycling than burning it and west sussex already has sufficient capacity to deal with current and future demand for this type of disposal. The highway system leading to this site is totally inadequate for current needs and the additional heavy goods vehicle movements will overwhelm the dangerously narrow roads and increase the already unacceptable accident rate at the A259 Oyster Catcher junction as well as making journeys through Yapton more congested, dangerous and damaging to air quality. I urge the Council, to reject this proposal and seek other ways to manage waste recycling. Regards David Lowsley
