| Comments | I strongly object to this rubbish incinerator this will be damaging to our health with the toxic emissions and damaging to the environment the huge structure will be an eye sore and destroy views of arun valley and National Park. I am extremely concerned with all the new houses being built nearby that they will have this monstrosity near them and also the long term effects on their health. There are lots of nurseries farms nearby and with this incinerator burning night and day will be damaging for our local crops let alone destroy our air quality. In Germany these incinerators have been banned and closed and apparently the law is changing in July with regards to this sort of incinerator so feel that this is being pushed forward before the law changes. I am also concerned as to all the lorries weekly using our local roads for this incinerator where new houses have been built. |
