Type of Comment	Objection
Comments	I strongly object to this proposal and will continue to protest. How can it possibly be ok to grant planning for such a facility on the edge of a national park, which isn't even for waste of people in the area? It will have a direct impact of the south downs national park with an increase in large vehicles travelling through it to reach the facility, as well as being in clear view from the national park in many location. Not to mention the increased pollution in the area from the facility itself and vehicles accessing it, which will effect peoples health. Also with the impact on property values for homeowners. It will damage the investments people have made by purchasing their properties prior to this eyesore, which could now see them worth a lot less.
