Objection

I write to object to this proposal for several reasons: 1) There is no evidence of the need for this type of waste incinerator unit in the UK as we already have over-capacity. There is increasing evidence that such units are not environmentally friendly, for they alter other more holistic approaches to recycling and are harmful with regard to noise, air and light pollution. They are worse than fossil fuel burning for the production of CO2. 2) The site proposed for this expansion is totally unsuitable as it is also planned for over 1,500 houses in what will be effectively a new town including new primary schools. This region is being deluged with houses and there are more houses under construction at nearby Yapton and Climping. Law cases are becoming common across the country in areas where such units exist as residents complain of ill health, mental and physical as a result of living in close proximity with such units. 3) The road transport infrastructure in the area is not capable of coping with the extra demand that this unit will create, for lorries in particular, especially when you consider the problems of the region with new housing and roads planned for nearby Chichester, a new ring road, development of the A27, and new towns in Tangmere, Oving and Barnham. 4) This is a coastal plain and the site will be visible for miles around affecting the livelihoods of those living in the coastal resort of Littlehampton and the Cathedral/Castle town of Arundel. It will cause planning blight in the area and affect the revenue of local authorities.
