Type of Comment

Objection

I object to this application because it will be a gigantic eyesore and blight our beautiful South Coast and Downs. From Trundle Hill to the Isle of Wight and the the South Downs Way, people travelling or just relaxing and taking in the view will find this carbuncle competing with the likes of Chichester Cathedral, Arundel Castle and Cathedral. The permanent plume of Carbon and sulphur dioxide mixed with various oxides of Nitrogen, raising to twice the height of Chichester cathedral will send a monumental advert to the world that we want to pollute the South Downs and that we don't care about the environment. How can this proposal be considered when 2,000 houses are to be built in its back yard and every local Neighbourhood Plan is against the development? I live downwind of this modern Auschwitz that will murder our environment on an industrial scale. The applicants say there was a public consultation but I never received notification of such a consultation which seems to have been carried out in secret under the cover of a Covid lockdown. Whatever happened to democratic process? These projects have very long lifetimes but technology is evolving and such a pace, scientists already believe that incineration is not the way forward. New thinking will leapfrog this ugly, environment destroying monster. I hope you do not let this pass on your watch.
