Comments	The nature of the surrounding community and landscape does not lend itself such an investment in the area so close to the South Downs. This development would be a massive eyesore in the landscape, not withstanding the impact an incinerator would have on the health and well being of local people. The approval of new housing and associated transport infrastructure in the immediate vicinity of this development already impacts on the local community, with considerable reduction in green space and increase in traffic and pollution. Adding a massive incinerator gives further weight to the idea that the Arun Valley and spaces like it are unimportant and take second billing to infrastructure, industry, concrete and environmental damage. I am a local resident of a beautiful community that will be blighted by an awful environmentally negative build on our doorstep.
