Application number	nent for planning application WSCC/011/21
Name	Alastair Smith
Address	KING STREET, 36, KING STREET, ARUNDEL, BN18 9BW
Type of Comment	Objection
Comments	I strongly object to this proposal for a number of reasons: 1. The visual impact of this proposal with cause significant harm affecting the unique setting of The South Downs National Park, ancient monuments, SSSI's and Grade I listed building within the local vicinity. The proposed building, which is on an ancient flood plain will be visible for miles around and cause a disproportionate visual impact. 2. The proposal will lead to a significant increase in HGVs and the local road infrastructure will struggle to cope with this. 3. Recycling is a central pillar of green initiatives to address environmental concerns. An incinerator in contrary to recycling initiatives 4. West Sussex has sufficient incineration sites with permission. This proposed site is simply not required 5. The incinerator will harm air quality in the local area causing harm to human health and natural environment. 6. This site is more ideal for the development of housing and failure to use it for this purpose will harm Arun District Councils key strategic plan for housing. 7. Local democracy needs to be upheld. Local referendum supported the use of this site for housing and backing ADCs strategic plan. I sincerely hope that this harmful proposal is rejected.
