Comments	1. The proposal will destroy the one visual gap in development between Bognor and Brighton - between our beautiful and valued South Downs National Park and our special unspoilt coastline in the Climping beach vicinity. 2. How can this be compatible with the important key strategic development of much needed additional housing and community amenities? 3. Surely, now the country is uniting around greening energy and combating climate change, now is the time for more innovative and radical proposals for our waste.
