Type of Comment	Objection
Comments	We as a country are supposedly trying to reduce climate change but having extra lorry movements 240 - 400 is hardly environmentally friendly or helping reduce climate change. The emissions this plant will produce is now one of the dirtiest ways of producing energy not to mention what effects it will have on the environment and everyone's health. The facility is not required to deal with waste produced in West Sussex, so it is totally unnecessary and in the completely wrong area to be dealing with this type of process for dealing with waste.
