Collin	ient for planning application wsec/off/21
Application number	WSCC/011/21
Name	Michael Crockett
Address	DOWNVIEW ROAD, 9, DOWNVIEW ROAD, ARUNDEL, BN18 0HL
Type of Comment	Objection
Comments	The road system around Yapton and Ford is already overcrowded so the extra truck use is a danger. The site for this type of facility should be much further away from large housing areas and where prevailing winds would take fumes well away from housing and schools. More housing and/or an incinerator are not compatable with the area. Incineration is not green energy. The emissions can be harmful to human health as well as the environment. The visual impact of the building and chimneys will affect the South Downs National Park dramatically. The roads are not suitable for the volume of HGV movements proposed. In the 1980's people objected to the small amount of flying taking place from Ford airfield and it was forced to close. This incinerator is far more harmful.
