Comments	This is a monster imposition on an area composed of villages - Ford Climping Yapton Barnham Elmer Middleton - totally ill-suited to a non industrial landscape. The transport infrastructure is not in any way capable of coping with the works traffic the plant will generate. The initial concept of placing such a plant in a rural seaside environment blows the mind. How could sane people come up with such a scheme? Why not Windsor Park or Southdown National Park or Hyde Park? How daft can developers get? It is beyond belief that the scheme has got this far
