Objection

I am totally against this diabolical idea! Do not ruin this beautiful area! We have chosen this place to retire and do not want it ruined! This incinerator is dangerous and noise air and light polluting. It will have an unsightly visual impact on the South Downs and negatively impact the historic Town of Arundel. Emissions including dioxins, NO2 and ultra fine particulate matter which is harmful to humans and the natural environment. There is no local need for local incinerators, they harm recycling - The county should be recycling more rubbish and not burning it in incinerators especially given the pressures of climate change This is NOT green energy, it harms the air quality and produces more CO2 than coal and oil generated electricity combined. Up to 240 additional HGV movements - 77% increase along Ford Road - so add concerns about traffic and air pollution from that traffic The surrounding road structure is not sustainable to accommodate heavier, larger lorries which will be used when the plant is built This project is out of character and is going to blight the whole of the Arun Valley The environment and health of the surrounding community is at risk Not enough monitoring Not enough enforcement Not enough transparency STOP THIS MONSTROSITY FROM GOING UP!
