| Comments | I'm concerned significantly about the visual impact to a sight so close to a National park, the emissions. This is not green energy and will have a hideous impact on the West Sussex environment. The surrounding road structure is no where near suitable for such a site. Those who brought this application forward are attempting to commit a hideous crime against the people of West Sussex, in the year when the UK is hosting COP how on earth can they think this is a responsible thing today. |
