Comment for planning application WSCC/011/21

Application WSCC/011/21 number	
Name Claire Maher	
Address 5 COUNCIL COTTAGES, ARUNDEL, BN18 9QQ	
Type of Objection Comment	
Comments I wish to object to application WSCC/011/21 for the following reasons: 1) Impact on environ air quality: Emissions from the proposed development, including dioxins, NOx, and ultrafine matter would be extremely harmful to both human health and the natural environment. Incidence one of the worst ways of generating energy because of its CO2 emissions and effect on Clima Change. It is also a barrier to the circular economy (recycling). Furthermore, West Sussex all enough incineration sites with permission to meet its needs. 2) Visual impact: This vast build have a devastating visual impact. At 13 storeys high, and with two towers reaching a colossa storeys, it would be visible from as far away as Chichester, affecting Scheduled Ancient Mont the South Downs National Park, Grade 1 listed buildings, and Sites of Special Scientific Interwould also close-up the one visual gap in urban development between Bognor and Brighton. Increase in heavy goods vehicles on local roads: The surrounding roads simply won't be able with the size and weight of the HGV movements being proposed. The roads around the site, particularly Ford Road, already struggle to cope with the weight of traffic, so adding a high n additional HGV movements to this will bring the whole area to a standstill. The increase in H will also add to the issue of poor air quality and pollution. I would strongly urge West Sussex Council to reject this development.	particulate neration is ate lready has ding would al 28 uments, ests. It 3) e to cope number of GV traffic
