Comments	I am a stall holder at the Ford Market and Car boot sale Three times a week i have some health issues and i am concerned that the new incinerator is too close to the Market putting myself and the public at risk and it will also deter customers coming to the Market. Already in the UK 40,000 people die of air pollution and i believe these types of incinerators should not be put in places so close to people quite honestly, I believe this is a reckless decision based purely on Greed. I will be taking further action with the Good Law Project in tackling this current governments irresponsible short term planning permission which is going to create so many problems in the future.
