Comments	I object to the Ford incinerator building plan. Its excessive size and design would be highly damaging to the immediate landscape and views from the South Downs National Park. It is contrary to national policy that the planning system should support the transition to a low carbon future in a changing climate. Addressing climate change should underpin both plan-making and decision-taking. We need to move our economy away from the take, make, use, throw away, system to a more circular economic model that keeps resources in use for longer and ensures that we extract the maximum value we can from them.
