Comments	I am appalled by the prospect of this hideous processing plant in our delightful rural and attractive village setting. Most of the families that live here do so because of the beauty of our surroundings, this idll would be shattered by the grotesque chimneys and buildings. We have been chosen to house this monstrosity because we are all small communities that have only a weak voice and not enough finance to oppose this development. Not to mention the huge number of vehicles involved in a network of roads that cannot cope with the existing loads, and the micro particles that would be contaminating the air we breath.
